

As a consumer who uses DSL from two separate small ISPs (one personal, one business) I strongly urge you to reject the petitions of Bell South and other large providers to deregulate broadband service. I prefer to deal with a smaller company and there are many like me. I do not want to be force to subscribe to a large conglomerate, which is what this deregulation will ultimately force. Monopolies are un American, protect small businesses. thank you for your consideration in this matter.-Kendra Hall
